

Time tester BHAC3000 – BHAC6000

For domestic circuit breakers

Test of 1 to 10 products

0,5 % accuracy over the entire range

Temperature control

Blowing function

Control software with connection to SAP base

Viewing trip times

Transfer of results to client reporting

Overview :

The time tester BHAC6000 and BHAC3000 are made on the basis of a tombstone system provided by the customer. It is equipped with power plugs (special model). The transformation is to equip it with a current generator and a switching system. The whole is controlled by a software connected to the client SAP database.

Specifications

	BHAC3000	BHAC6000
Current range	0,5 à 31A – 48V 20A à 63A – 24V	0,5 à 60A – 48V 30 à 125A – 24V
Frequency	50 – 60 Hz	
Accuracy	± 0,5 % of setpoint	
Temperature	Dry contact input	
Blowing	Dry contact output
